

## JOB DESCRIPTION

<b>Job Title:</b>	<b>Operational Hydro-Meteorologist/Forecaster</b>
<b>Division/Office:</b>	<b>Technical Support Division</b>
<b>Salary Level:</b>	<b>M-11</b>
<b>Date of Verification (If any):</b>	<b>May 2022</b>

### 1. THE MEKONG RIVER COMMISSION AND MRC SECRETARIAT

The Mekong River Commission (MRC) was established by the 1995 Agreement on Co-operation for the Sustainable Development of the Mekong River Basin, between the governments of Cambodia, Lao PDR, Thailand and Viet Nam. The role of the MRC is to coordinate and promote cooperation in all fields of sustainable development, utilization, management and conservation of the water and related resources of the Mekong River Basin.

The MRC Secretariat is the operational arm of the MRC. It provides technical and administrative services to the Joint Committee and the Council to achieve the MRC's mission.

#### VISION for the Mekong River Basin:

An economically prosperous, socially just and environmentally sound Mekong River Basin

#### VISION for the Mekong River Commission:

A world class, financially secure, International River Basin Organization serving the Mekong countries to achieve the basin Vision

#### MISSION of the Mekong River Commission

To promote and coordinate sustainable management and development of water and related resources for the countries' mutual benefit and the people's well-being

#### MRC values

- [Integrity](#)
- [Transparency](#)
- [Mutual respect](#)
- [Professionalism](#)
- [Accountability](#)
- [Results orientation](#)

### 2. JOB SUMMARY/JOB STATEMENT

The jobholder ensures the provision of accurate and timely forecasting and early warning information products. He or she uses relevant monitoring systems and assures the timely dissemination of regional flood forecasts and warnings (alerts) to stakeholders, as well as information on drought.

### 3. MAIN TASKS AND RESPONSIBILITIES

Under the management direction of the Division Director and technical advice of the Chief Hydrologist and in close collaboration with the River Flood Forecasting Specialist, the incumbent performs the following duties:

- Support the checking of quality of incoming hydro-met data transmitted from monitoring stations in Member Countries, verify model input data, simulate water levels and provide forecasting analyses based on model results
- Provide regular forecasting services to Member Countries, e.g.:
  - Flood season: daily 1-5 days flood forecast
  - Dry season: weekly water level forecast
  - Provide flash flood guidance at village (CMA-LAO) and district levels (TL-VN)
  - Provide flash-flood analysis based on retrieved maps and create village- and district level-flash flood alerts
  - Drought monitoring and forecasting in the whole LMB
- Calibrate and update forecasting models, in close cooperation with the Modellers;
- Contribute to the development of relevant technical guidelines as led by other specialists / Divisions;
- Provide technical support to the work of the MRC's regional technical/expert group related to flood risk management, climate change, and/or emergency response (if applicable), and contribute to the work of other regional groups as required;
- Ensure that relevant knowledge and products developed by the MRC are available at the national level to assist decision-making processes;
- Contribute to and support the implementation of the MRC Procedures, especially in what regards river monitoring;
- Perform other relevant tasks as required.

### 4. SCOPE OF AUTHORITY

- a. **Supervision requirements:** The position does not require any formal supervisory responsibilities.
- b. **Level of autonomy:** Decision making follows defined procedures. The position does not administer a budget, yet has responsibility for ensuring the financial accountability of MRC.
- c. **Level of problem solving required:** Problem solving skill is expected and the incumbent must display sensitivity, initiative and creativity
- d. **Level and type of communications required:** Communications are wide, within and outside the organisation, and require considerable oral and written skills.

### 5. QUALIFICATION REQUIREMENTS

<b>Certificate:</b>	University degree (Master or higher) in hydrology, hydraulic engineering or other related field
<b>Additional Certificates:</b>	<ul style="list-style-type: none"> <li>• TOEIC certificate with 600 points and over is required. An equivalent internationally recognized certificate or a university degree from an internationally recognized academic institution whose instruction is in English may also be considered.</li> </ul>

<b>Experience:</b>	<ul style="list-style-type: none"> <li>• Minimum 7 years of experience in developing and implementing river forecasting and modelling in large rivers</li> <li>• Minimum 7 years of experience in hydrological modelling and/or operational flood forecasting</li> </ul>
--------------------	--

## 6. COMPETENCIES

<b>7. Knowledge</b>	Level (1-3) 1 = Required 2 = Desirable 3 = Optional
Hydrological forecasting models	1
Computer programming languages	1
New technologies and emerging trends in flood forecasting	1

<b>Skills</b>	Level (1-3) 1 = Required 2 = Desirable 3 = Optional
Fast system operating	1
Time management	1
Problem solving (e.g. imperfect data)	1
Cross-cultural and interdisciplinary communication	1
Dissemination of information and warnings	1
IT	2

<b>Attitudes</b>	Level (1-3) 1 = Required 2 = Desirable 3 = Optional
Willingness to undertake regular field trips to identify and solve problems with stations	1
Work outside of normal office working hours in flood season, taking shift work in order to guarantee 24/7 forecasting availability	1
Attention to details	1
Autonomous working	2
