

MRC response to Prof. Zhijian Wang

The Mekong River Commission (MRC) would like to confirm receipt of the proposal on Using Basin Rights Approach to Calculate Laos' Water Rights relevant to Dam Building by Prof. Zhijian Wang.

Your proposal was noted and fed into the MRC technical review of the project. Key messages and recommendations from the stakeholder consultation sessions at the national and regional levels have been included in the TRR. The TRR is one of key deliverables of the prior consultation process and will be submitted to the MRC governance bodies for consideration during negotiation on conditions for the project.

We would like to welcome all inputs and contributions for the prior consultation processes as well as for other MRC works. We trust that what all of us are doing will sustain the Mekong River in the most sustainable way.
